Carl Dethlefs & Sons Angus

Carl Dethlefs & Sons Angus

Welcome!

Cattleman, Friends and Neighbors,

We would like to invite you to our 55th annual production sale on Saturday, January 14th. On behalf of the Dethlefs', we want to thank all of our friends, neighbors, and customers that have made it possible for us all of these years. We have been so fortunate to have met so many good people and good customers over the years throughout raising Angus cattle.

Our true pride and joy is our cow herd. We believe in culling our cow herd hard, demanding that our cows wean heavy calves, breed back on time, and hold their body condition throughout the year. Our cows are not bred for light birth weights, they are bred to calve easily. There is a difference. Because of this, you will find good bulls in this sale from the start to the end. We truly believe you cannot find a better set of 2-year-old bulls anywhere.

With so many different breeding decisions available, we try to keep it simple. If you breed a good cow to a good bull, you should get a pretty decent calf. Everyone's idea of a good one can vary, but ours doesn't. We believe they must be sound in their structure, perform near the top of their group, and move well on solid feet and legs. No matter how good their EPDs are, there are no exceptions. EPDs are a nice tool, but we don't breed solely for them. We feel that if you take care of the traits you can see and weigh, you will be much better off in the long run.

We will be selling over 100 big, stout, 2-year-old virgin bulls. As always, these bulls are our top end. They are not picked over, and come from over 250 head of bull calves. They have never been fed hard and have been developed on pasture so they get plenty of exercise.

We offer 2-year-olds for a number of reasons. The reason for us is so we don't have to calve in a lot, and can calve on pasture in March/April. The reason for our customers is so they can buy a bull with confidence knowing that he will be able to service more cows his first year, hold his body condition, and not wear out. We are very proud of the fact that you can see what you're actually getting with a 2-year-old compared to a yearling. It takes an exceptional yearling to make a good 2-year-old.

Just like last year, lots 1-29 of the sale are genomic tested. Most of the bulls' growth EPDs increased substantially. Because of that, it would be safe to say that the bulls we did not genomic test would also have more growth than their current EPDs indicate.

We hope everyone has taken advantage of the higher calf prices, although I know everyone has experienced higher input costs. If the good Lord would send some moisture our way soon, the future couldn't be brighter for cattleman. As always, we would love for you to stop by to look at the cattle and visit. Be sure to join us for lunch on sale day.

Thank you again,

The Dethlefs family

Lunch

A complimentary lunch will be served from 11 a.m. to 12:30 p.m.

Volume Discount

A 5% discount on the purchase of 5 or more bulls.

Trailer Discount

Bring your trailer on sale day and save \$100 per bull on a qualified purchase.

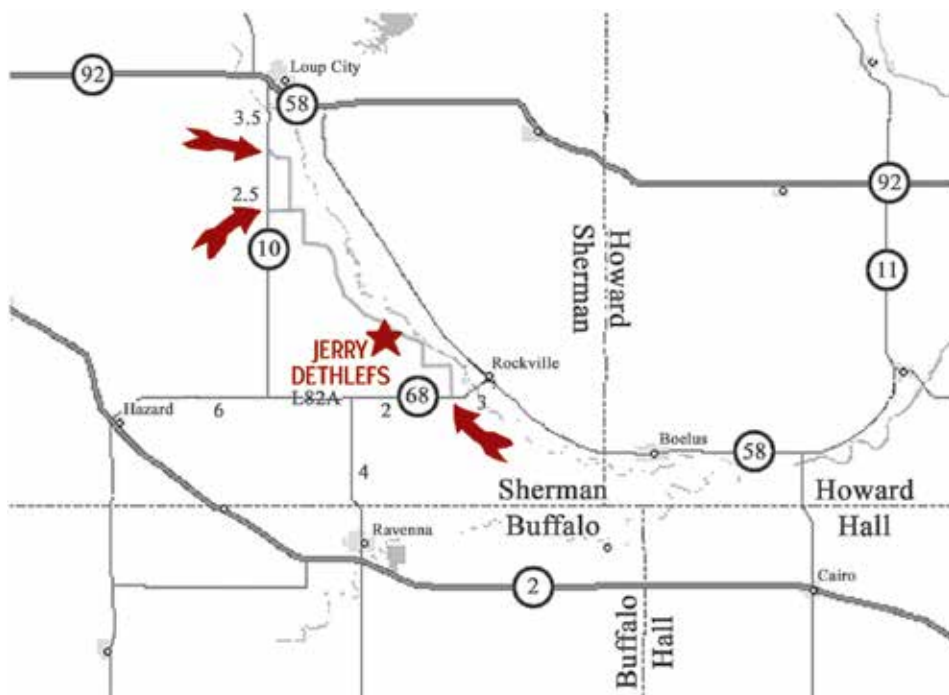

Free Delivery & Wintering

Free delivery on bulls to a central location within 300 miles on a purchase of \$3,000 per individual or a total purchase of over \$5000. Delivery will begin shortly after the sale. Due to the earlier sale date, we are offering an option to winter your bull for free until March 1, 2023. If you choose for us to winter your bull, we STRONGLY recommend that you buy insurance on your bull, which will be offered on sale day. We do our best to keep your bulls free from injury, but we are not responsible for injury or death while wintering your bull.

Sale Location and Directions

Sale to be held at the Jerry Dethlefs ranch near Rockville, Nebraska.

Directions to ranch: 3-1/2 miles south of Loup City on Hwy. 10, then 7 miles southeast on S. River Road to ranch; or 3 miles south and west of Rockville, Nebr., on Hwy. 68, then 5 miles northwest on S. River Road to the ranch.

Herd Health and Guarantees

All cattle selling are free of CA-NH and AM defects by test or pedigree. The bulls are fertility tested and are guaranteed breeders. Out-of-state buyers will be furnished with necessary health papers.

Semen Tested.

Breeding Guarantee & First Season Guarantee

First Breeding Season Guarantee to September 1, 2023, on injuries that occur in the breeding pasture that make an injured bull incapable of service, an injured bull will be replaced by a suitable replacement if one is available. If no replacement is available, credit for half the cost over \$1,500 can be applied toward the purchase of another bull in next year's sale. Please notify us as soon as possible if an injury should occur and prior to injured bull being sold.

Vet verification is required. This does not cover death of bull or poor management or neglect. If full coverage is desired, insurance will be available sale day and we will pay 2.5% of purchase price toward your insurance.

Insurance

A representative from Dakota Ag Insurance will be available on sale day. We recommend a visit with the representative to discuss different insurance options. If you desire full coverage, we will pay 2.5% of the purchase toward your insurance.

Terms and Conditions

The terms of the sale are cash. All settlements must be made at the close of the auction.

All animals of breeding age are guaranteed breeders. Animals failing to breed in reasonable periods may be returned if in as good of condition

as when sold. The seller reserves the right to try said animal for five months and if it proves to be a breeder, return same animal to station of the buyer at the buyer's expense. If said animal proves sterile, the breeder may make a satisfactory exchange or refund the purchase price. All bulls are semen tested.

Special care has been taken to ensure accuracy in the matter of pedigrees and information included in this catalog, but we are not to be held responsible for any error which may appear and which is beyond our control. Corrections that may be discovered prior to the sale will be announced at the time of selling. Any disputes as to bids shall be settled by the auctioneer, whose decision shall be final and shall bind purchases to the announcement of the sale and sale price.

Dethlefs bulls are managed to fit the needs of the commercial producer!

Can't make the sale?

DVAuction Broadcasting
Real-time Auctions

We are pleased to bring you real-time Internet bidding and a live broadcast of this sale through DVAuction. To watch or bid online, complete the following steps:

1. Visit the DVAuction website at www.dvauction.com
2. Click on the "Register" tab.
3. Enter a user name, password and your contact information.
4. Click on "Apply for Bidding."
 - Select the sale from the list of other auctions and click "Apply."
 - Complete the process by filling out the Banking & Lending information requested.
 - Be sure to include a personal contact at your bank. We will contact them in order to get a credit reference.
 - If you would prefer to be approved using your credit card, call 402-316-5460.
 - Please be sure to apply for bidding at least a day in advance of the sale. Every effort will be made to process your application in a timely manner.

DVAuction will contact you once you have been approved to bid. We do not provide buyer numbers until you have purchased a lot in the sale, and that number is only usable for that auction. After the sale contact the sale owner or manager to make arrangements for payment and delivery of your online purchase.

PLEASE NOTE:

High speed Internet access (DSL, T-1, or Broadband) is required to be able to bid successfully during the sale. If you have any questions, please contact DVAuction at 402-316-5460 or 402-474-5557 or email: support@dvauction.com

PROXY BIDDING:

If you can't access a computer during the sale, you can now place a "proxy bid" through DV Auction. Simply follow the instructions listed above, and as the sale date nears there will be a "Proxy Bidding" link under the sale listing on the main page of DV Auction. You can then place the maximum amount that you'd like to bid, and our system will represent your bid just as if you were there.

Why use an age-advantaged bull?

Are you ...

- Tired of buying over-conditioned yearling bulls that fall apart during the breeding season?
- Questioning if your yearling bull will be able to cover your mature cows?
- Afraid that your yearling bull won't be able to service very many cows?

There is nothing wrong with using a yearling bull; however, you are often asking that bull to do a lot. More often than not, the bull has been fed a high concentrate diet and pushed until the time of the sale.

These young bulls, sometimes not much over a year of age, are turned out and expected to go to work going from a high concentrate diet to a forage diet.

On top of that, that yearling bull is still growing and maturing. His nutrient requirements are going to be a lot higher than a mature animal.

Therefore, he will often lose weight during the breeding season, and will need more supplement over the winter to be ready for the next breeding season.

We do the hardest part for you!

When you receive one of our bulls, he is mature, in the right condition, and ready to go to work. His hardest year is already past him. He will be able to ...

- Be trusted to service mature cows his first breeding season
- Be able to service many more cows his first breeding season
- Hold his body condition a lot easier throughout the season
- Last the whole breeding season, not wear out halfway through

Reasons to use Dethlefs bulls ...

- We don't "push" our bulls, so they are not over-conditioned come sale time.
- They aren't in a lot. They are out on pasture getting plenty of exercise until sale time.
- Our cow herd is expected to survive the same way a commercial herd does – have good dispositions, calve unassisted, raise a heavy calf and re-breed in a timely manner year after year.
- We don't breed solely for EPDs like many do. Instead we focus on breeding sound, functional cattle that look the part.
- We equally value growth, carcass and maternal traits in our cattle.

We bought Reliabull from Mick Varilek at Geddes, SD where he was the second high selling bull. As a yearling, we turned VR out in a half section with 65 first calf heifers. We thought we would get him out when he started to run out of gas. He never ran out, he bred all those heifers and grew and held condition great. He is an amazing pasture breeding bull. He throws a lot of depth and weight with a smaller birth weight. We calved the first heifers last spring and they have been outstanding.

President sold for \$750,000 in the 2017 SAV sale. President's pedigree speaks for itself. His calves are moderate in size and show a lot of thickness down their top and rear quarter. We look forward to calving some really nice heifer mates to these bulls this upcoming spring.

Ten Times is a 10X son out of the famous BA Lady 6807 305 cow. His dam has produced 12 test station winners. She is also the dam of Active Duty - Tour of Duty, the \$175,000 RB Lady Standard cow and many other outstanding progeny. Ten Times, from his first calf crop, has 98 ratio on birthweight to a 103 ratio on yearling weight. His calves have an avg IMF ratio of 105 and a fat ratio of 89 making him a very good carcass sire as well. His birth to yearling spread and his carcass data give him as good of EPDs as any bull in the breed.

Our bulls are ...

weaned in mid-October and grown on a high roughage ration designed for 2 to 2-1/2 pounds of gain per day until spring. They are grown on pasture with minimal supplementation during the summer and fall and will be kept in pasture up to sale time. They will get plenty of exercise and be in the right condition to go home and go to work for you.

McConnell President 9007 was our pick out of the 2020 McConnell Angus bull sale. He weaned at over 970 pounds and showed tremendous length and thickness through his rear quarter. His SAV Density donor dam is also the mother to McConnell Altitude, a popular Genex sire. His calves have extra length and growth. We lost him that first year on pasture but were lucky enough to have semen collected on him.

We knew for years some of the very best producing cows have been Net Worth daughters. So we found some Net Worth semen and used it on some of our best non Net Worth daughters. We did not get as many daughters as we would have liked, but we did get some darn good bulls. Net Worth has been around for a long time and his calves have stood the test of time. They have always been outstanding cattle.

We bought Identity from the Krebs Ranch where he was the heaviest member of his class winning carload at Denver. We have been very pleased with the calves from Identity. His birthweight EPD has come down to +1.7 while having a yearling EPD of 125. His calves show excellent depth and thickness. He is one of the best footed, most sound moving bulls we have seen anywhere. He stays in great good shape during breeding season and we can see that fleshing ability in his calves. We have used a lot of AI sires over the years, but none have been as consistent as Identity. His easy fleshing moderate sized calves would work in most environments anywhere. Identity is one of the best, most complete sires we have ever used.

This President bull is a sale highlight. He's a long bodied, muscular bull with a great amount of capacity. It is hard to find a fault in the structure of this bull, and his feet are absolutely perfect. He is a very complete bull that is about as docile as they come. His 13-year-old Net Worth donor dam is a cow we view as the best in our herd, and one to build a herd around. She has calved on time every year and has a WWR of 109. There is no doubt this bull is the cow making kind.

YW	YR	1193	95

CED	BW	WW	YW	MILK	MARB	RE	FAT	\$B	\$C
8	0.2	65	105	24					

Another Varilek Reliabull son that will work on heifers. His Excitement dam maintains a WWR of 100 on 5 calves.

[illegible]

Driving the science of better breeding

There's little room for error in the cattle business. Producers need the most advanced information to make smart selection decisions, and Angus Genetics Inc. (AGI) provides it through genomic-enhanced expected progeny differences (GE-EPDs).

GE-EPDs have become the industry standard for herd improvement, building on decades of science-backed genetic evaluation tools originated and maintained through the American Angus Association*, home to the largest and ever-growing single-breed beef cattle database.

EPDs that traditionally contained all pedigree, performance and progeny information now also include results from available genomic, or DNA, tests. Breeders who use genomic technology give buyers access to AGI-generated GE-EPDs that provide:

Increased predictability and decreased risk for young and unproven animals due to enhanced accuracy of EPDs

Better characterization of genetics for difficult-to-measure performance traits (such as carcass traits, maternal traits and feed efficiency)

The ability to make more rapid progress for traits that are important to you, due to:

- more accurate selection
- easier identification of genetic outliers
- the ability to propagate young animals with confidence earlier in their lives

In fact, GE-EPDs on unproven animals have the same amount of accuracy as if they have recorded an average of 15 progeny, depending on the trait. That's valuable insight, offered regularly through the breed's weekly national cattle evaluation.

TRAIT	PROGENY EQUIVALENT	TRAIT	PROGENY EQUIVALENT
Calving Ease Direct	25	Pulmonary Arterial Pressure	17
Calving Ease Maternal	19	Hair Shed Score	8
Birth Weight	23	Heifer Pregnancy	17
Weaning Weight	27	Maternal Milk	35
Yearling Weight	22	Mature Weight	14
Yearling Height	15	Mature Height	9
Dry Matter Intake	11	Carcass Weight	14
Scrotal Circumference	13	Marbling Score	10
Docility	11	Ribeye Area	16
Foot Claw Set	13	Backfat Thickness	13
Foot Angle	13		

How do you know if EPDs are genomic-enhanced?

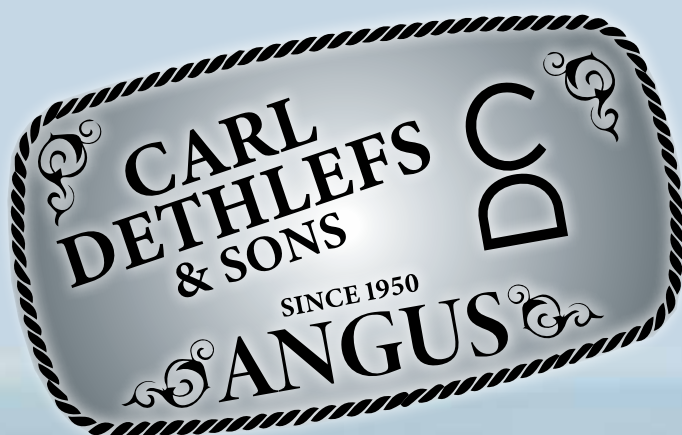

Ask your breeder, refer to the registration paper, or look for the AGI GE-EPD logo, Angus GS™ powered by partner Neogen or the HD50k by partner Zoetis. These images indicate animals for which genomic testing has been conducted and incorporated by AGI into GE-EPDs
